PROFESSIONAL SUMMARY

Business & Technology Consulting Engineer with 2.5+ years of experience delivering digital transformation and Data & Analytics solutions for Fortune 500 enterprises. Skilled at translating complex business requirements into analytics products, executive-ready insight, and AI-enabled platforms. Brings product management experience from roadmap definition through Agile delivery

WORK EXPERIENCE

IPSERLAB LLC | Product Manager Intern | Los Angeles, California

Aug 2026 - Present

- Own the product requirements document (PRD) for an internal product, translating engineering constraints & business goals into user stories, acceptance criteria, prioritized backlog for Agile development team.
- Partner cross-functionally with engineering to prioritize features, clarify requirements, and resolve blockers mid-sprint, keeping the product roadmap aligned with evolving business priorities on Jira/Confluence.
- Spearhead GenAI/LLM integration into the platform, assessing use-case fit against system architecture and user needs, and designing the user acceptance testing (UAT) plan to validate releases against stakeholder requirements.

METROPOLITAN TRANSPORTATION AUTHORITY - MTA | EAM Intern, Strategic Initiatives | New York, NY

Jul 2025 - Dec 2025

- Analyzed operational and asset datasets using SQL and AI-assisted analytics, applying GenAI tools for data manipulation, cleansing, and transformation across enterprise asset workflows to surface efficiency opportunities that improved decision-making accuracy by 20%+.
- Designed 3+ data models, Power BI dashboards and data frameworks on Azure Data Lake and enhanced GIS data pipelines within HxGN EAM, improving data quality and real-time asset visibility across enterprise reporting workflows.
- Streamlined cross-functional governance using Jira & Confluence, improving project performance improvement by 25%

ERNST & YOUNG LLP (EY) | Advanced Analyst, Staff II – Business Consulting, SCM Product, Analytics | Bengaluru, India

Dec 2022 - Aug 2024

- Delivered end-to-end digital transformation for 3 key products under the EY ASTERISK SaaS platform, architecting and implementing AI-enabled SCM solutions with predictive demand forecasting, boosting supplier-vendor collaboration by 15% and reducing time-to-market by 20%.
- Managed Agile sprint planning and workstream delivery across engineering, supply chain, product, and finance teams for Fortune 500 clients (Automotive & FMCG), aligning technical execution with business outcomes across engagements valued at \$2M+.
- Orchestrated 20+ ETL data pipelines (Python, SQL, Azure Databricks, JS7) driving Analytics, streamlining data for analytics and enhancing data quality by 30% while cutting infrastructure load costs by \$18K annually and consistently meeting SLA delivery.
- Deployed 10+ Power BI dashboards integrating KPIs and geo-based vendor/supplier data for executive reporting across 50M+ records, augmented with GenAI-generated summaries for strategic decision making.
- Drove CRM integration and product management, partnering with business stakeholders to define requirements, prioritize sprint backlogs, and streamline product performance improvement.

CONSILIO LLC | Data Operations Analyst | Bengaluru, India

Oct 2022 - Dec 2022

- Developed data strategy for legal compliance operations, designing cloud-based data hosting pipelines for eDiscovery forensics and enforcing data privacy across 5,000+ records, across 20+ clients lifting analytical throughput 30%

Strategy & Product: SDLC, PDLC, ServiceNow, Jira/Confluence, Business Strategy, Product and Stakeholder Management, GTM Strategy, Product Road mapping, SCM Analytics, Program and project management, Requirements Gathering, Agile/SDLC, Process Mapping, CX

EDUCATION

PACE UNIVERSITY

MS, Management Information Systemsee, *Concentration: Data Engineering & Analytics*

June 2026

GPA: 3.8

JAIN UNIVERSITY

BS, Computer Science, *Applied CS, Data & Analytics*

July 2022

GPA: 3.64

PROJECTS

Capstone Research: "THE SUGGESTIVE BANKER – AI Banker"

- Consumer Trust Factors in Proactive Agentic AI for Digital Banking – 2026

SmartChurn: Customer credit card attrition prediction system using AI first - ML

- Python, Tableau, Scikit-learn, XGBoost

Bipolar Occurrence Prediction via Machine Learning & Deep Learning

- TensorFlow, PyTorch – Published Research Paper – 2022

CERTIFICATIONS & ACHIEVEMENTS

- AWS Solutions Architect Associate (SAA-C03) - Amazon Web Services

Jan 2026

- McKinsey Forward Program - McKinsey & Company

Dec 2025
