SUMMARY

Data & Analytics Consulting Engineer with 2.5+ years delivering digital transformation, data solutions, and AI-enabled products across SCM enterprise operations. Skilled in bridging business, data & technology to turn complex requirements into data-driven decisions

PROFESSIONAL EXPERIENCE

IPSERLAB LLC | Product Manager Intern | Los Angeles, CA

Aug 2026 – Present

- Lead product requirements for an internal platform, structuring business goals and engineering constraints into a **PRD, user stories, and acceptance criteria** that anchor a prioritized **Agile backlog** and **product roadmap**, tracked in **Jira/Confluence**.
- Drive **GenAI/LLM integration strategy**, evaluating use cases against system architecture and user needs, and designing the **UAT framework** that validates each release against stakeholder requirements, resolving mid-sprint blockers with engineering.

MTA HEADQUARTERS | Data Strategy Analyst, EAM Intern | New York, NY

Jul 2025 – Dec 2025

- Analyzed operational and asset datasets using **SQL** and GenAI-assisted data cleansing and transformation across enterprise asset management (EAM) workflows, surfacing efficiency opportunities that **improved decision-making accuracy by 20%+**.
- Built **3+ data models** and production-grade **Power BI** KPI dashboards on **Azure Data Lake** and enhanced **GIS data pipelines** within **HxGN EAM**, improving data quality and real-time asset visibility across enterprise-wide asset reporting workflows.

ERNST & YOUNG LLP (EY) | Consulting Analytics Engineer, Staff II | Bengaluru, India

Dec 2022 – Aug 2024

- Delivered digital transformation for 3 products on the **EY ASTERISK SaaS platform**, implementing AI-enabled supply chain solutions with demand forecasting that **boosted supplier-vendor collaboration by 15%** and **cut time-to-market by 20%**.
- Engineered **20+ ETL data pipelines** (Python, SQL, Azure Databricks, JS7) powering supply-demand analytics for Automotive & FMCG clients, **improving data quality by 30%**, **cutting infrastructure costs by \$18K annually**, and consistently meeting SLAs.
- Deployed **10+ Power BI dashboards** unifying KPIs and geo-based vendor/supplier data across **50M+ records** into executive-level reporting for stakeholders, with GenAI-generated insight summaries that **drove a 35% boost in operational efficiency**.
- Managed **Agile sprint planning** across engineering, supply chain, product, and finance teams on **\$2M+ Fortune 500 engagements**.
- Partnered with **C-suite client stakeholders** to drive CRM integration, requirements definition, and product backlog prioritization.

CONSILIO LLC | Data Operations Analyst | Bengaluru, India

Oct 2022 – Dec 2022

- Designed **cloud-based data pipelines** for legal eDiscovery, enforcing data privacy across **5,000+ records** for **20+ clients**.
- Leveraged analytics workflows and **data warehousing** to **lift operational efficiency by 20%** and **case output by 30%**.

SKILLS

Programming & Core: Python (Pandas, NumPy, PyTorch), SQL, OS, Git, Docker, Microsoft Office (MS 365, Excel, Access, PowerPoint)

Data & Cloud: ETL/ELT Pipelines, Data Modeling, Databricks, Airflow, Microsoft Fabric, Azure, AWS, PostgreSQL, MySQL, SaaS

Analytics & BI: Power BI, Tableau, Excel, Data Visualization, KPI Frameworks, Predictive Analytics, RapidMiner, GIS

AI / ML: GenAI, LLMs, Agentic AI, RAG, Prompt & Context Engineering (Claude, OpenAI, Copilot)

Product & Strategy: Product Roadmapping, PRDs, UAT, Requirements Gathering, Agile/Scrum, Jira/Confluence, ServiceNow, GTM

Certifications: [AWS Solutions Architect – Associate \(SAA-C03\)](#), Jan 2026 | [McKinsey Forward Program](#), Dec 2025

EDUCATION

PACE UNIVERSITY – MS, Information Systems (Data & Analytics Engineering) | GPA: 3.8

New York, NY | Jun 2026

JAIN UNIVERSITY – BS, Computer Science (Applied CS, Cloud, Data & Analytics) | GPA: 3.64

Bengaluru, India | Jul 2022

PROJECTS

- Capstone Research** – "The Suggestive Banker": Consumer Trust Factors in Proactive **Agentic AI** for Digital Banking 2026
- SmartChurn:** Credit card attrition prediction system using ML (Python, Scikit-learn, XGBoost, Tableau) – [GitHub](#) 2025
- Bipolar Occurrence Prediction via Machine Learning & Deep Learning** (TensorFlow, PyTorch) – [Published Research Paper](#) 2022
